

Harmony of nature and technology in every step

Harmony of nature and technology in every step.

FLOOREO IS A PLACE WHERE EUROPEAN QUALITY AND CENTURIES—OLD TRADITIONS IN THE PRODUCTION OF FLOOR COVERINGS MEET.

The Flooreo factory is a new innovative enterprise that combines European experience and centuries—old traditions in the production of floor coverings. It is located in Georgia, a country of amazing culture and impressive landscapes. Our factory is a perfect fusion of nature and innovation. We are proud to be able to present you products that meet high standards, while maintaining the unique innovative technologies that make our floor coverings available to embody any design idea.

PEAKS

COLLECTION

HERRINGBONE

12 MM.

We were inspired to create the PEAKS collection by centuries-old mountains with majestic peaks and rocky glaciers arranging our plant. This collection embodies the strength and resilience of mountain ranges, conveying their power and majesty.

MADE IN GEORGIA

FLOOREO.GE

CLICK

Installation of FLOOREO laminate does not require A and B type boards, as it is manufactured exclusively with a universal A–A locking system. This ensures a strong connection and reduces installation time by up to 50% (applies to the PEAKS and WATERFALLS collections).

The RIVERS collection features the SMART-Click locking system.

Assembly is extremely simple and requires only downward pressure from the top. No additional longitudinal tapping is needed.

WATER-RESISTANCE SURFACE

Water resistance is provided by the increased density of the HDF board, the unique joining of the boards and the waterproof coating of Fask

E 0

Our laminate has a formaldehyde emission class of E 0, which guarantees the exclusion of harmful substances and ensures maximum protection of your family's health.
